SUMMARY

Data Scientist with approx **~5 years of experience** in automation, data modelling, Machine Learning and GEN AI. Skilled in Python, data structures, inferential statistics, and various data science packages.Worked on projects across multiple industries Insurance and CPG, multiple domains such as automation, data modelling, price optimization, ML model package development. Seeking to leverage my expertise and passion for data to create innovative solutions for challenging problems.

SKILLS

- Python, SQL
- Azure, Datarícks
- Regression, Classification
- Machine Learning, NLP
- Django, PySpark, MlFlow
- Statistics
- Gen AI, LLM, RAG, Agentic
- Pricing and Forecasting

WORK EXPERIENCE

Kraft Heinz India GCC Data Scientist • May 2025 - Present

Price Optimization & Algorithm Development

- Implemented Machine Learning models to understand the impact of pricing and promotions on sales and provide recommendations on optimal strategy for various categories to ensure balance between market share and profitability.
- Deploy E2E industrialization for 2 major categories in Brazil and currently delivering 2+ categories in US market with 40%-time efficiency.

Global Demand Forecasting

- *Lead a Data Science team to architect an end-to-end forecasting pipeline on Azure, executed on a distributed computing framework*
- *Built robust data ingestion and preprocessing pipelines from Snowflake, ensuring data quality.*
- *Designed and deployed hierarchical time-series forecasting models using the Nixtla framework, with model tournamenting to select bestperforming models across hierarchies.*
- *Productionized workflows using Azure Databricks / Azure ML batch pipelines, enabling automated scheduling, model versioning, and performance monitoring.*
- *Integrated Generative AI (LLM-based) components to explain forecast drivers, summarize variances, and generate planner-ready insights.*
- *Established model governance covering accuracy (MAPE, bias), exception detection, and human-in-the-loop feedback from Demand Planners.*
- *Integrated forecast outputs into o9 dashboards, embedding analytics into Demand Planning, Supply Chain, and S&OP scenario workflows.*

Tiger Analytics Data Scientist • March 2022 - May 2025

Price Optimization & Algorithm Development

- *Objective : Implemented a comprehensive retail price optimization project aimed at developing a strategic pricing approach that maximizes profit and sales while considering key factors including competition, customer behavior, and market trends.*
- *Algorithm Development : Developed an algorithm leveraging price elasticity of demand for revenue forecasting.*
- *Model Deployment :*
  - *Deployed various loss minimization and optimization techniques to examine models and simulations.*
  - *Created methods to address infeasible solutions and constraints in pricing outcomes.*
- *Pricing Engine Development : Built a pricing engine capable of computing optimal prices at store and item-level granularity. This engine optimized objectives such as net sales and net margin, considering factors like demand, cost, inventory, competition, and promotions.*
- *Simulation Tool Creation : Developed a simulation tool allowing business executives to assess the impact of price changes on key performance indicators (KPIs) such as net sales, margins, and revenue.*
- *Key Achievement : Enhanced model efficiency by 8x-10x, enabling actionable insights on price adjustments with accurate revenue and margin forecasts.*

Tiger Analytics Senior Analyst • March 2022 - May 2025

Dashboard Data

- *Developed data cleaning pipelines for several different retailers' datasets using Data Bricks, ensuring consistency and accuracy in data processing.*
- *Implemented quality control measures at each stage of the data cleaning process to validate data integrity and completeness.*
- *Standardized data formats across all retailers by mapping to a common column (EAN), facilitating seamless data consolidation.*
- *Orchestrated the consolidation of cleaned data and its subsequent transfer to SQL Pipeline, streamlining data management and analysis processes.*

Alunoz Technologies Associate Data Scientist • November 2021 - February - 2022

Facial Recognition Using Open CV (one shotlearning) (11/2021 - 12/2021)

- *Developed a facial recognition system utilizing the Facenet architecture within OpenCV.*
- *Implemented DeepFace for efficient feature extraction and comparison.*
- *Achieved an impressive accuracy rate of 93% in facial recognition tasks.*
- *This project demonstrated proficiency in leveraging advanced computer vision techniques to achieve high accuracy rates in facial recognition using state-of-the-art methodologies.*

EDUCATION

Master in Data Science & Big Data

Central University of Rajasthan • 2019–2021

Bachelor of Science in Computer Science

Magadh University • 2016–2019
